Location: Northern Cape, South Africa

Operator Process Controller Trainee Program at South32

South32 is accepting applications for Operator Process Controller Trainee Program.

As an Operator Process Controller in Training, you will be responsible for monitoring and controlling the safe and efficient execution of Processing activities.

Other key responsibilities include, but aren't limited to:

- Conduct Plant inspections and ensure plant readiness on SCADA;
- Monitor and control plant operation;
- Communicate with the relevant stakeholders to ensure production targets are met;
- Monitor stockpile levels, plant operating parameters and product quality
- Troubleshooting and correction of deviations in the process;
- Maintain housekeeping standards and ensure compliance to plant safe operating procedures
- Utilise SCADA and Ampla systems to capture and monitor production data;
- Provide assistance as a holder in executing shutdown processing work;
- Relieve the Production Supervisor if required:

ABOUT YOU:

You will have experience and demonstrate capability in the following:

- Must have a minimum of 3 years experience in a processing plant.

Qualifications for this role are:

- Grade 12;
- Valid driver's license;
- Mineral Processing level 2 qualification;
- Mineral Processing Level 3 qualification is advantageous.
